Let me take you on a journey to a realm beyond our own with this captivating photo series, capturing the behind the scenes magic of the set of Tamino and Angèle's 'Sunflower' music video.

This was truly one of the most unique sets I've ever had the pleasure of working on, with three full days dedicated to bringing this otherworldly vision to life. A miniature moon, more than a hundred small LED lights individually hung from the roof, and a 100-meter-long theatrical backdrop were just a few of the elements used to create this mesmerizing set. Not to mention the energetic and hard working crew!
